42" Gate Kit (adjustable up to 50" wide)	HG07520		

**Part Number Plus Color Identifier:** B=Black, W=White, Z=Bronze, M=Mahogany, O=Oak (where applicable)

Prior to construction, check with your local regulatory agency for special code requirements in your area. Common railing height is 36" or 42". Never span posts more than 8' on center for baluster railing systems and 6' on center for glass railing systems. Always ensure there is proper blocking under each post as per installation instructions. Read installation instructions and view installation videos to get a complete understanding of how the Harmony Railing™ products assemble.

### HELPFUL ORDERING INFORMATION:

- Baluster section kits include attachment clips and screws. If panels are cut and two pieces are used for installation, a separate attachment kit must be purchased.
- Anchors and fasteners to secure posts to concrete or wood are **NOT INCLUDED** in kits.
- Maximum post spacing on deck for vertical cable railing is 6' on center.

Written installation instructions and videos can be found online at [HarmonyRailing.com](http://HarmonyRailing.com).

### IMPORTANT NOTES:

- Actual 6' panel length = 69.43".
- 3" posts are required to reach 6' lengths.
- Stair railing panels will accommodate 30-40° stair angles.
- 45° deck angles require 22.5° clips applied to each side of the post. The 22.5° clip kit is sold **SEPARATELY**.
- Using 2 Posts at top of stairs is recommended if compound angle cut is required.
